

WHY YOU SHOULD SEE A DENTIST IF YOU HAVE DENTAL PROBLEM

If you have a dental problem, then you should see a dentist. Your doctor is neither trained nor qualified to treat dental problems and will decline to do so.

If you are not registered with a dentist, then contact NHS 111 which will provide details of the dental services you can access.

There are dental access centres which provide a walk-in service on weekdays, weekends and bank holidays in:

Evesham Tel: 01386 502453

Worcester Tel: 01905 681796

Kidderminster Tel: 01562 514515

If you are registered with a dentist, then you need to contact them. You can also use the access centres for urgent treatment at weekends and on bank holidays.
