

How do I find my NHS Number?

- It is written on your NHS medical card.
- Your old GP practice will have this information and will usually be happy to provide it to you over the phone
- If you know the area where you were previously registered as a patient – your NHS number can be obtained by contacting the relevant PCT for that area.
- Your NHS number is written on most hospital letters and appointment slips.

If you have not previously registered with an NHS GP in the UK an NHS number will not be required for registration with the Caversham Practice.
