28th January 2021

Dear Patient

Further to my previous communication dated 13th October 2020 and a public consultation which started on 8th December 2020, conducted jointly between the practice and NHS Wirral Clinical Commissioning Group (CCG), I write to update you on the relocation of the Field Road GP Practice.

The CCG Primary Care Commissioning Committee considered the application and all the evidence to relocate GP services from Field Road to Earlston Medical Centre. The Committee supported the relocation proposal at its meeting held on Tuesday 12th January 2021. The GP services at Field Road Health Centre will be permanently relocated to Earlston Medical Centre from 1st April 2021.

As you are aware all GP services from Field Road were relocated to Earlston Medical Centre at the start of the pandemic in April 2020 to accommodate the creation of a Covid treatment hub at that site. Over the past 9 months, Miriam Primary Care Group has delivered uninterrupted service to all Field Road Practice patients from its two sites at Earlston Medical Centre and Miriam Medical Centre. This arrangement will now be formalised to ensure the delivery of an improved range of services by a multidisciplinary team with extended opening hours.

During the consultation period, we received a number of concerns, comments and suggestions from patients. We will address those issues to ensure we provide a high quality service to you all.

As you are already registered with Miriam Primary Care Group, you do not need to take any further action. You will continue to receive ongoing care and all your medical records have been merged with Miriam Primary Care Group since September of 2019.
