

Statement of Equal Opportunity for Patients of Minchinhampton Surgery

All patients will be treated fairly on the basis of need and not discriminated against on the basis of age, sex, race, religion, disability or sexual orientation.

GPs and staff working at the surgery comply with the practice's Equal Opportunity Policy which reflects the full range of UK legislative requirements. Procedures are monitored and staff induction and training cover Equal Opportunity requirements.

The practice makes reasonable adjustment, within the confines of the surgery building, for patients with particular needs. Every individual's needs are unique so please ask at Reception if there is anything we can do to help. For patients with hearing problems, a portable induction loop is available from reception. Interpretation and translation services for patients who do not speak English can be arranged with prior notice.
